Subject: Information and Communication Technologies Futures Tiger Teams report

The ICT futures tiger teams have wrapped up their work and presented reports to interim Chief Information Officer Chris Kielt and the larger ICT Futures team, completing phase I of our ICT Futures timeline. I want to thank the Tiger Team leaders and members for their dedication to this important initiative. The report is available on the [ICT Futures site](#).

The recommendations developed by these teams will be utilized to prioritize ICT unit initiatives and to identify focused process improvements in alignment with NMSU strategic goals. Additionally, the recommendations will be used to launch the search for a permanent CIO this winter. I am pleased to announce that Sherry Kollmann, vice provost for digital learning initiatives, has agreed to chair the selection committee with a timeline to welcome our new ICT leader in late winter/early spring.

As this process continues, please send your feedback and suggestions to sss@nmsu.edu.
